SENDING FILES VIA WEBOFFICE

This document describes the process on sending files to the terminals remote through the Flowbird WebOffice system.

 When you have received and downloaded the Special Event files, log into the CALE WebOffice website with your username and password. Once logged in, select Terminal Administration / Terminal Maintenance / Create One-time Job / New Configuration Job.

4. In the Schedule Job field, choose the date and time to have the file uploaded to the meter, and in the Effective Date section, select when the change will take effect. Leaving the Effective Date field blank will place the new file in effect as soon as it's downloaded to the meter. Once the meter, correct file, and dates are chosen, then hit Save in the upper left-hand corner.
