Topic----Bill acceptor removal from mounting frame.

Follow the steps listed

1. Remove mounting frame with Bill unit from meter.
2. To remove the Bill acceptor from the frame you will need a 9mm socket with extension or a 9mm nut driver.
3. Remove the cash box.
4. Refer to the images below—remove the two top nuts and the two center nuts located at midpoint of the unit.
5. Lift out Bill acceptor.
6. To install place the Bill acceptor in the frame set the frame upright and install the nuts with 9mm socket. The reason for standing this upright, unless you have a magnetic socket it would be difficult to get the center two nuts in place
