

# Meters with ID TECH Card readers & Card handler boards

The card handler board is the interface between the reader and the mainboard  
Card handler board is mounted on top of the ID Tech Card reader.  
There are 3 LED lights on the top of the board to help with Trouble shooting

Red LED on reader has power.  
Yellow Card has started to be inserted  
Green Card has been fully seated

If the Red & Yellow LED are on at the same time with out inserting a card.  
The card present switch is not functioning. Reader needs to be replaced

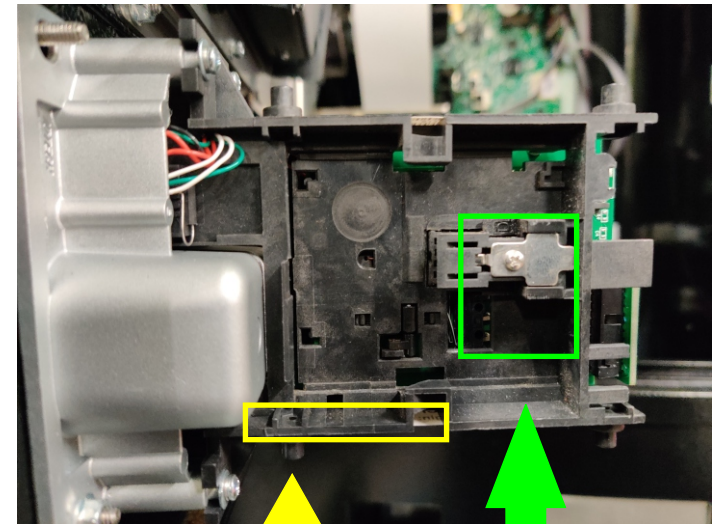

If the Red & Yellow LED are on at the same time with inserting a card fully & the Green LED is not off.  
The card seated switch is not functioning. Reader needs to be replaced

1st is Card reader power  
(RED LED)

2nd is Card present  
(Yellow LED)

3rd is Card seated  
(Green LED)

Card Present switch    Card seated switch
